

# Knowledge Base

- Knowledge base constitutes a meeting point and information repository for data reuse which includes information for all profiles (experts and beginners).
- It is foreseen to be interactive and continuously updated.
- This tool will be accessible through the EuDEco website [data-reuse.eu](http://data-reuse.eu)

- Each section will consist of a drop-down menu available in a landing page in which the user can specifically access to the content that they wish.
- The characteristics of this platform will be:
  - Scalable and adaptive
  - User friendly
  - Rewarding in terms of interaction
  - Responsive
  - Unsupervised rating system.
  - Social media interactive (Facebook, LinkedIn, Twitter)
  - User report

## Data Open Bar

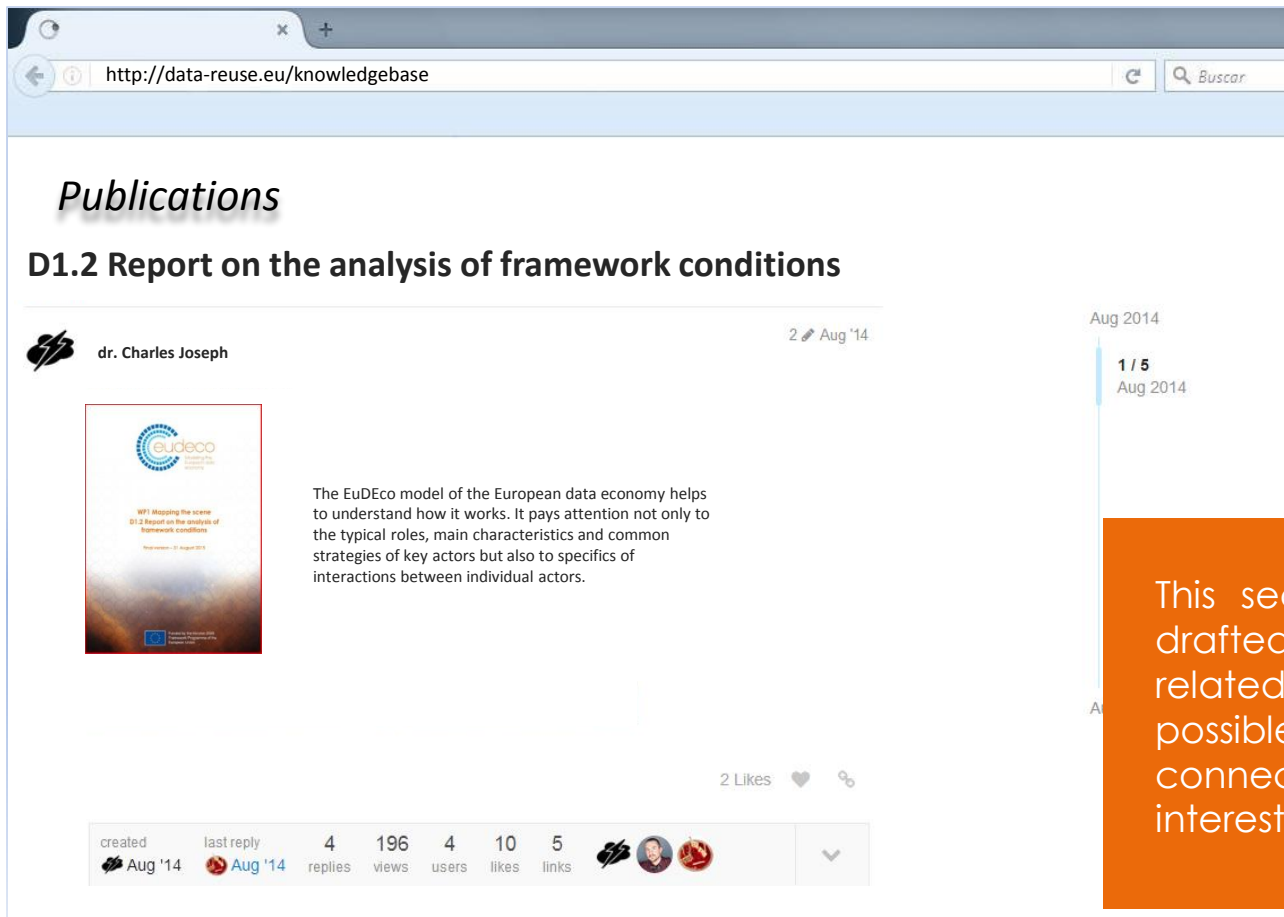

Question	Avatars	Count	Views	Date
What do the avatars in the topic list mean?	J, [Avatar], [Avatar], [Avatar]	3	202	Jan 17
What's that thing under the first post?	J, C, [Avatar]	2	207	Mar '16
How do I reply to folks here?	J, T, [Avatar], [Avatar]	4	211	Mar '16
Is there a Markdown or BBCode reference?	J, [Avatar]	1	199	Jan '16
Whoa. Check out this crazy paper artwork art	D, [Avatar], [Avatar], [Avatar]	3	214	Sep '15
Recommend a great YouTube video	[Avatar], [Avatar], [Avatar], [Avatar]	4	196	Sep '15
Can I log in with Google and a forum log in too?	J, [Avatar], [Avatar]	3	180	Sep '15
What's the coolest thing you have worked on?	[Avatar], C, [Avatar], [Avatar]	3	181	Sep '15

This section will host a discussion forum consisting of a wide range of topics related to data economy. In such, users will be able to provide different types of materials as well as easily comment on them.

Analogically with the concept of an open bar, users will be allowed to freely intervene, and as a novelty, to rate other users' contributions.

#### D1.2 Report on the analysis of framework conditions

dr. Charles Joseph 2 Aug '14

The EuDEco model of the European data economy helps to understand how it works. It pays attention not only to the typical roles, main characteristics and common strategies of key actors but also to specifics of interactions between individual actors.

As for this section, the innovation comes with the possibility for users to add new data-related meetings and conferences, rate them and indicate their attendance.

The latter prerogative is foreseen to empower networking and featured collaborations among users.

This section constitutes a repository of different multimedia resources containing initially all existing videos from EuDEco and progressively fed with other educational elements.

Users will be able to enrich the site with new multimedia contents provided that such meet certain requirements in terms of accuracy, relevance and quality.

## *Data for dummies*

BIG DATA

GDPR

OPEN DATA

DATA REUSE

CYBER SECURITY

DPO

The most innovative section of the Knowledge Base tool is *Data for dummies* in which different basic contents related to data economy will be hosted such as a basic-term dictionary, FAQs, mini explanatory videos, etc.

It is conceived as a good way to promote and raise awareness about the importance of data economy thanks to a very simple approach and the possibility to be continuously updated by participants.
